PROFESSIONAL SUMMARY

Early-career Software Developer with hands-on experience in enterprise banking technology, gained developing, testing and supporting COBOL-based banking applications. Skilled across Java, JavaScript, Python, SQL and REST APIs, with practical exposure to backend development, databases and cloud fundamentals. Experienced in debugging, root cause analysis, testing and production support within structured SDLC and Agile environments, with a continued interest in software engineering, backend development, cloud computing and cybersecurity.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python, COBOL, SQL

Backend / Development: REST APIs, API Development, API Testing, Node.js, Express.js, Flask

Databases: MongoDB, PostgreSQL, SQL

Software Engineering: SDLC, Agile, Unit Testing, System Testing, Debugging, Root Cause Analysis, Data Validation, Code Reviews, Production Support, Technical Documentation

Tools: Git, GitHub, Postman, Jira, ServiceNow, Topaz Workbench

Enterprise / Banking: Hogan/ELIPS, Mainframe Environment, JCL, Enterprise Banking Systems

Cloud: AWS, Microsoft Azure

PROFESSIONAL EXPERIENCE

Junior COBOL Developer | Absa Group — Randburg, Johannesburg

Jul 2025 – Apr 2026

- Developed, tested and maintained enterprise banking applications within the Hogan/ELIPS environment.
- Investigated and resolved software defects and production/system issues.
- Performed root cause analysis and debugging on production-related issues.
- Built and tested REST APIs using Topaz Workbench and Postman.
- Performed data validation, unit testing, system testing and quality assurance activities.
- Worked with QA teams to investigate and verify defects and fixes.
- Participated in production support and standby activities.
- Worked within structured change management and software development processes.
- Participated in code reviews and incorporated feedback from senior developers.
- Worked with enterprise banking and mainframe technologies including COBOL and JCL.

COBOL Developer (Trainee Programmer) | CAPACITI — Braamfontein, Johannesburg

Oct 2024 – Jun 2025

- Completed an intensive software development programme.
- Worked with COBOL, Java, JavaScript, Git and SDLC practices.
- Applied requirements, development, testing and debugging processes to practical projects.
- Practiced Git/version control and collaborative development workflows.
- Developed foundational software testing, debugging and clean code skills.
- Worked in team-based, project-based environments.
- Developed problem-solving, analytical and teamwork skills.

PROJECTS

Attendance Tracking Automation — Python, Flask, MongoDB, QR Code Scanning, Google Forms, Twilio

- Developed an attendance-tracking solution to automate participant check-ins and reduce manual administration.
- Used Python, Flask and MongoDB to process and store attendance information.
- Integrated QR-code scanning and automated communication.

Bank Management System — Node.js, Express.js, MongoDB

- Developed a backend application for managing banking-related customer and account data.
- Implemented server-side functionality using Node.js and Express.js.
- Used MongoDB for data storage and database operations.

- Applied backend programming, API and database concepts.

EDUCATION

Bachelor of Information Technology in Business Systems

Rosebank College | 2020 – 2022 | Overall average: 67.6%

Higher Certificate in IT in Support Services

Rosebank College | 2019 – 2020

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals
- IBM COBOL Core
- IBM COBOL Software Development Process
- SAS Certified Specialist: Base Programming Using SAS 9.4
- Linux Commands & Shell Scripting Essentials
- COBOL Basics
- Automated Cyber Security Incident Response Course

ADDITIONAL INFORMATION

- Areas of interest: software engineering, backend development, cloud computing and cybersecurity.
- Background spans enterprise banking technology, systems support and software development.
